

## RADIALINIAI VENTILIATORIAI RFC; RFE

IP-55 Darbinė temperatūra: -30+85 °C, Ex -30+40 °C

**Žymėjimas:**

|   |           |                  |
|---|-----------|------------------|
| Z - cinkuotas plienas; E-dažytas                          | 1- 230 V  | 7 -680 aps/min   |
| Ex1 - sproгимui saugiam išpildyme                         | 3 - 400 V | 10 -960 aps/min  |
| Ex2 - FM - variklis su termistoriais                      |           | 15 -1450 aps/min |
| H - horizontalaus išpildymo                               |           | 30-2880 aps/min  |
| AKV1 - nerūdij. plienas A 304 maisto, farmacijos pramonei |           |                  |
| AKV2 - nerūdij. plienas A 316 chemijos pramonei           |           |                  |
| DB - ventiliatorius be antivibracinio pagrindo ir kojelių |           |                  |

*Greičio  
reguliatorius*
